### Other activities

- 2002 Founder and Honorary Chairman of the [German Telemedicine Centre -DTZ e.V.](#)
- 2005 Member of government working group on trade and industry (non-permanent)
- 2015 Member of the German Economic Council, [Bundesfachkommission Digital Health](#)
- 2018 [Member of the Digitalization Working Group of the DGOU](#) (German Society for Orthopedics and Trauma Surgery)

### Inventor [Patent list Dr. Achim Hein](#)

EvoCare® uses a patented device and method for the electronic acquisition and evaluation of medical data. [Patent: reference 102 47 440.0, teletherapy, therapy system and therapy method](#). EvoCare® is the result of a spin-off from SIEMENS AG and a development cooperation with the Friedrich-Alexander-University Erlangen-Nuremberg. EvoCare® already took its first steps in the 1990s as [SIEMENS HealthMen](#) and as "Universal Training Assistant". Dr. Hein is the [inventor of the EvoCare® teletherapy](#), a therapy system and therapy methods.

### Author / Doctoral Thesis

[Springer Verlag, 2004, Processing of SAR Data. Fundamentals, Signal Processing, Interferometry.](#)

- [View on Google Books](#)

Dr. Achim Hein is the author of numerous specialist publications in the field of telemedicine:

- Guidelines for teletherapy, creation of the basis for the requirements for TeleReha aftercare of the German pension insurance
- Certification of medical facilities for the provision of teletherapy
- Fundamentals of the White Paper on Digitization in Treatment, German Telemedicine Centre e.V.
- Thieme: Magazin Schlaf, 4/2018. An established project for the digitized continuation of treatment.

### 2018 Member of the DGOU working group on digitization as an expert for telemedicine

Dr. Achim Hein is a member of the 2018 new founded [working group Digitalization of the German Society for Orthopedics and Trauma Surgery](#). The increasing digitalization of society also has an impact on health care. Doctors in clinics and practices have to deal with many digital innovations today and in the years to come. As an interface and partner of the three orthopaedic and trauma surgery specialist societies DGOU, DGOOC and DGU, the Digitalization Working Group wants to address important topics in orthopaedics and trauma surgery at an early stage, deal with them in a targeted manner and actively participate in shaping them.

### 2015 Federal Commission for Digital Health Economic Council Germany

Dr. Hein is a member of the [Federal Commission for Digital Health](#) of the German Economic Council. The Economic Council of Germany is an entrepreneurial professional association of

the CDU with 11,000 members, which also advises members of the party. Through the use of digital technologies and modern e-health applications, the efficiency of the healthcare system and the quality of care will experience significant growth rates. The digital revolution in the health care system is supported by four key components: Networking, telemedicine, new therapies and data protection. If Germany wants to maintain its high standard of healthcare in the long term, especially in view of demographic change, it must pave the way for modern processes and, in particular, for the use of digital health throughout the healthcare system. This is the only way to master the manifold challenges. These include the shortage of skilled workers in the health care system, the guarantee of high-quality care in the city and in rural regions, and ensuring that the system can be financed on a permanent basis.

### Honorary post

Dr. Achim Hein was involved in the advisory board. The non-profit ACCESS GmbH is a specialist service dedicated to the qualification and placement of people with disabilities in the general labour market. [Integration example](#)

### Political commitment
